WATER PUMP IMPELLERS V4/V6/V8

**Water Pump Impeller Identification
V4/V6/V8**

There have been only four different water pump impellers used in the 1958-2006 V4, V6 and V8 Johnson / Evinrude 2-Stroke outboard motors.

The 1958-1968 V4 engines are identified by the thru-cavitation plate exhaust gear housings.
The impeller number is: **Part No: 377992**

The 1969-1972 V4 engines are identified by the thru-prop exhaust gear housings with electric / hydraulic shift. They are shifted electronically with an electric shift control box (only one mechanical cable running to the engine, a throttle cable). The impeller number is: **Part No: 385072**

1973-1978 V4 and V6 engines use an impeller that fits on a .875 inch diameter shaft and is held in place with a half-moon key. The impeller number is: **Part No: 389642**

1979-2006 V4, V6 and V8 engines use an impeller that fits on a .875 inch diameter shaft and held in place with a white plastic wedge key. The impeller number is: **Part No: 435821**

<p><p>V6 90° HEAVY DUTY Replacement Gears for the "O" Type Gear Housing</p><p>*22666 GEAR SET DOES NOT COME WITH A CLUTCH.</p><p>CALL OR CONTACT US FOR PRICE & AVAILABILITY</p><p>When all three gears need to be replaced in your V6 Johnson / Evinrude Outboard the installation of the new Part No: 22666 Heavy-duty gear set is highly recommended. The heavy-duty gear sets can be used with all V6 outboards from 1979-2006 with the "O" type gear housing. It is recommended that the new clutch Part No: 337774 also be installed with the heavy-duty gears.</p></p>	
 <p>CALL OR CONTACT US FOR PRICE & AVAILABILITY</p> <p>IMPORTANT NOTE:</p> <p>The new heavy-duty Part No. 22666 gears will not interchange with the standard gears.</p>	<p>✓ STRONGER</p> <p>OEM gear sets are machined from 8620 forged steel. The GLM gear set is machined from higher alloy forged steel. The stronger teeth and higher alloy steel results in a gear that is 50% stronger than any other comparable gear set. These durable gears are capable of operating with up to 300 horsepower.</p>
	<p>✓ MORE DURABLE</p> <p>The new GLM gear set has fewer, larger, and stronger teeth. The pinion gear has 12 teeth and the forward and reverse gears have 22 teeth. The original OEM gear set has 14 teeth on the pinion and 26 teeth on the forward and reverse gears.</p>
	<p>✓ QUIETER</p> <p>During the gear machining process, an additional pass is made over each tooth for a finer surface. This makes the gear operation especially quiet.</p>
